

MERA System Operations Update

MERA System Maintenance

During the month of June, the Communications Division provided the following support:

1. Continued efforts with Federal Engineering in support of MERA Next-Gen
2. Completed all preventative maintenance.
3. Still investigating reoccurring issues with the Primary West Simulcast Central Site Controller. Motorola support has no knowledge of this vintage of equipment, they only offer "best effort" support.
4. Replaced faulty air conditioner at the San Pedro site.
5. A dedicated air conditioner was installed in the Master Site UPS room to address reoccurring high temp alarms.
6. Continued investigating creating defensible space around the mountain top radio sites. Currently Bolinas, and Pt. Reyes are top priorities.
7. Checked generator fuel level at all sites in anticipation of PG&E Public Safety Power Shutoffs.
