C. Operations Reports

1. MERA System Operations Update – December

Todd Williams reported on this item as included in the agenda packet, stating the network has been performing outstanding with no outages in December. Quarterly maintenance is being

performed and going well. He reminded agencies that after-market battery chargers are causing issues and only the proper batteries should be used. President Pearce inquired whether this was passed on to the Operations group; Mr. Williams noted this issue came up after the last Operations Meeting. Mr. Jeffries stated this was discussed at the Training Committee and agencies were provided with Motorola chargers, so it could become an agency cost if it continues.
